

H'IT Scan: Your Mobile Solution For Syspro

Revolutionise your inventory management and improve your efficiency and customer service with H'IT Scan, our mobile solution software for Syspro. Written specifically to integrate with the inventory management functionality within Syspro, and using 100% standard Syspro web services functionality to communicate with your business system, our solution offers the easiest, quickest and no-nonsense approach to implement barcode technology into your operation.

Barcode and mobile technology can save you money via:

- Lower labour costs from reduced manual data entry.
- Reduced labour costs because staff have critical information, at the place that it's needed, at the moment it's needed.
- Reduced costs from customer complaints and credit notes, due to increased accuracy in shipping goods.
- Less management time lost investigating mistakes caused by incorrect manual input.
- Reduction in the cost of training warehouse personnel, in high turnover positions.
- Reduction in the cost of Syspro licenses, compared to having a full Syspro license for every mobile operator.
- Improving the accuracy of inventory levels, and achieving real time stock, therefore reducing the amount of 'Safety Stock' that has to be held.

Mobile technology costs less than you think !

"supporting Syspro users across the UK"

Tel: 0116 277 3197 www.mrhit.co.uk

The industry standard demonstrated payback time for barcode solution implementations is between 6 and 18 months. Can you afford to be left behind? We can make it easy for you.

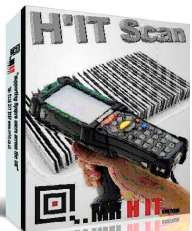

Transactions:

- Purchase Receipts
- Stock Take
- Stock Receipts
- Stock Adjustments
- Expense Issues
- Warehouse Transfers
- Bin Transfers
- Goods In Transit Out
- Goods In Transit In
- Inventory Query
- Inventory Backflush
- .. With more to come

Features:

- All data validated using standard Syspro rules to ensure complete data integrity.
- All security validated according to standard Syspro rules.
- Utilises standard Syspro Web Services for maximum 'Future Proofing' and to avoid ANY changes to your standard software.
- We can provide the software alone, or act as a 'One Stop Shop' for all other aspects of your project as required. *
- Enhanced serial number management features.
- Can be integrated with labelling systems as required.
- Wide variety of devices and supported operating systems, to reduce the cost of implementation
- Can use intelligent 2D barcodes to maximise benefits and reduce manual entry, or regular 1D barcodes to minimise learning curve and use existing hardware and labels

- Standard package and customised versions available !

Call us now to find out more, and for a free demonstration!

* Please note that depending on your existing licensing situation, this solution may require the purchase of Syspro components from your existing Syspro license provider.
